

## MICROCOMPUTERS IN FOREST RESOURCES: FRSC 1155

DR WAID

Room 116, YOW Bldg.

Phone: 391-4811

Office Hours: Posted at Office and in Classroom

LAB Period: Tuesdays

TEXTBOOK: None Required (Handouts will be provided by the instructor)

SUPPLIES: A 3.5" HD micro diskette **OR** A "Flash," or "Thumb Drive"

GRADING:		<u>Points</u>
	Two lecture exams (@200)	400
	Final examination	300
	Lab / homework / participation	100
	<u>Quizzes (4)</u>	<u>200</u>
	Total	1000

<u>Grade</u>	<u>Points</u>
A	900 - 1000
B	800 - 899
C	700 - 799
D	600 - 699
F	< 600

Students enrolled in the Forestry, and Wildlife Technology Programs will be expected to demonstrate an understanding of subject matter requiring higher order processing skills. Examination questions may include essay, synthesis, analysis, and application; as well as completion, multiple choice, true-false, and matching. Computational skills and drawing or diagramming may also be required.

### COURSE OBJECTIVES:

1. To learn computer terminology and the basics of microcomputer operation.
2. To learn how to manipulate files with DOS and DOS-based applications.
3. To learn the fundamentals of word processing, and computer spreadsheet organization and use.
4. To become familiar with techniques for locating, retrieving, and e-mailing information on the internet.
5. To become familiar with the techniques for constructing a digital slide presentation using Power Point

Students will be required to complete assignments outside of classroom hours.
