Total= _____

Total= _____

GPA= _____

Only core courses applicable to the nursing program should be counted (as listed above). Any attempt at those core courses should be counted. List your hours for each course taken. List your grades for each course taken. Calculate your points for each course by multiplying your hours by your grade (A=4, B=3, C=2, D=1, F=0). Example → PNUR 1104 – 2 hours X B (3) = 6 points. Total your hours and your points then divide the hours into the points. This will give you your GPA for consideration for the Nursing Program.
