Program Outcomes

Upon completion of the associate degree nursing program, the graduate will be able to:

- Utilize the nursing process and evidence-based nursing practice in providing safe care as an entry level registered nurse.
- Demonstrate the ability to function in the roles of provider of care, manager of care, advocate and member within the discipline of nursing.
- Utilize critical thinking skills in meeting the physiological and psychosocial needs of culturally diverse patients.
- Utilize therapeutic communication skills when collaborating with patients, families, significant others and members of the health care team.
- Demonstrate technical nursing skills while practicing within the ethical and legal framework of nursing.
- Implement basic safety principles when providing care for patients in contemporary health care environments.
