Marshall Court Decisions:

- *Fletcher v. Peck* (1810): established the new power to invalidate a state law as unconstitutional (it held that a Georgia law violated the *Contract Clause* in the U.S. Constitution)
- *Dartmouth College v. Woodward* (1819): established that the Constitution prevents a state from altering the charter of a private corporation (Dartmouth College)
- *McCullough v. Maryland* (1819): established that States may not tax a federal bank, and also that a federal bank is authorized by the "necessary and proper" clause in the Constitution
- *Cohens v. Virginia* (1821): established the supremacy of federal law, by allowing D.C. lottery tickets to be sold in all states except those prohibiting it
- *Cherokee Nation v. Georgia* (1831): holding that the Cherokees are not a nation in the normal sense, and could not sue in federal court. The court ruled that the Cherokee were a "domestic, dependent nation," a status that would guide federal Indian relations for the next forty years.
- *Worcester v. Georgia* (1832): The court ruled that Indian relations were the exclusive domain of the federal government and that the laws of the state of Georgia had no force within the boundaries of the Cherokee nation. Georgia ignored the ruling, and the Jackson administration made no attempt to enforce it.
