TIFTON – Abraham Baldwin Agricultural College celebrated Arbor Day on Friday by planting two weeping willow trees on the shore of Lake Baldwin. The trees were donated by Sodexo and members of the Sodexo grounds management prepared the trees and site prior to planting. These annual tree plantings are a way to involve the students and the community in the beautification of the ABAC campus. In the picture there are representatives from the Georgia Forestry Commission, the community, Sodexo, the ABAC Forestry Society and ABAC faculty, staff and administration.
