Important Information about Wi-Fi Access

**Student Access:**
Connect to the “Students” network for wireless devices. The user name and password is their user name for their email account without the @stallions.abac.edu and 6-digit date of birth (formatted MMDDYY), not their email password. Requests for student password resets for wireless access should be directed to the Academic Support Counselors at asc@abac.edu or 229-391-4995.

**Employee Access:**
Connect to the “BYOD” (Bring Your Own Device) network for wireless devices. After your device connects to this network, open your browser (e.g., Internet Explorer). You will be prompted to enter user name and password. This will be your ABAC computer login credentials.

**Guest/Visitor Access:**
Connect to the “Guests” network for wireless devices. Guest user accounts will be created and provided to the associated school, department, or office area.
