**Bayer CropScience Internship**

**Location: Tifton, Georgia / Southeast**

Bayer CropScience is one of the world's leading innovative crop science companies in the areas of crop protection, non-agricultural pest control, seeds and traits. The company offers an outstanding range of products, and has a global workforce of 20,700 people in more than 120 countries. The intent of the Bayer internship is not only to secure seasonal help for field activities, but to expose the candidate to the culture and activities of the company in the hope of identifying future full-time employees.

**Job description:** The primary responsibility of this role, as a Bayer CropScience Intern, is to assist Technical Service and Field Development Representatives in Georgia in their efforts to manage and conduct research trials and to support the regional sales force. The candidate will also be required to periodically assist other Field Development Representatives in Alabama and Florida.

**The incumbent will:**
- Assist in the establishment, maintenance, and evaluation of field test plots designed to determine the efficacy of pesticides on insects, weeds, and plant diseases of agronomic concern.
- Perform routine tasks associated with farm maintenance: operating farm equipment; working with irrigation; applying pesticides; harvesting activities; etc.
- Perform menial and mundane tasks: cleaning and maintenance of equipment and shop areas; pulling weeds; running errands; counting plants or insects; using a shovel or hoe for long periods of time; etc.

**Your qualifications:** The selected candidate is required to possess the following:
- A valid driver’s license
- Working knowledge of the Apple iPad, MS Word and Excel.
- Must be currently enrolled in, or a recent graduate of, a reputable four-year undergraduate or graduate program with a focus in the agronomic/horticultural sciences or a related field.

**Preferred Qualifications:**
- Experience with commercial vegetable and/or row crop production.
- Being detail-oriented and possessing analytical and creative thinking skills.

**SPECIAL NOTE:** Please DO NOT apply if you are unwilling to work outside in extreme weather conditions (heat/humidity/rain) for long periods of time. Also understand that the job will require you to look through a microscope for long periods of time.

Length of Internship: 3 months (potentially longer dependent on funding).

Compensation: Competitive, and commensurate with experience.

Interested candidates should submit a one-page resume to one of the following: scott.russell@bayer.com
