Guidelines for Student Internships

Students at ABAC who are able to enroll in a 9 credit hour internship program either as required for an Associate of Applied Science (AAS) degree in Diversified Agriculture or Environmental Horticulture or as an elective in Area F (Career Block) of the Bachelor of Applied Science (BAS) degree in Diversified Agriculture or Turfgrass Management. The overall purposes of the internship program are to integrate classroom knowledge with real-world learning experience, gain valuable work-experience and to develop a network of industry contacts.

- Students should complete approximately 30 credit hours of course work towards their major area of study before enrolling in an internship program. Internship can be completed anytime after this point but before graduation.
- Students must register and pay fees for AGRI 2207 (9 credit hours).
- Students must attend a schedule orientation session the semester prior to the internship.
- The student’s academic advisor must approve all internship sites. Students are not allowed to work at home, for relatives or site of previous employment without proper justification and approval from advisor.
- Employers must be informed of all objectives of the internship prior to employment.
