Bachelor of Science degree with a major in Biology

Student Learning Outcomes

1. Students will demonstrate an understanding of structure and function of living organisms at the cellular and organismal level.
2. Students will demonstrate knowledge of ecological and evolutionary processes.
3. Students will demonstrate knowledge of the diversity of living organisms.
4. Students will demonstrate proficiency in science process skills and basic research.
5. Students will demonstrate knowledge of laboratory and biotechnology skills.
6. Students will demonstrate effective communication skills, through written and oral means.
7. Students will demonstrate an understanding of the relationship between biology and other science disciplines.
