General Education

Student Learning Outcomes

1. Communication Skills:
   - Students are able to analyze the rhetorical situation and choose the appropriate genre and writing strategies.
   - Students follow the academic conventions of organization and standard written English.
   - Students select and employ multiple research methods, such as interpreting, evaluating, and explaining sources, and document sources ethically.

2. Quantitative Skills:
   - Students will demonstrate a strong foundation in mathematical concepts, processes, and structure, including the ability to solve multiple-step problems through varied modes of reasoning (inductive, deductive, or symbolic).

3. Institutional Options:
   - Students will apply effective communication skills that demonstrate clarity, critical analysis, rhetorical awareness, persuasion, and precision when presenting oral arguments.

4. Humanities, Fine Arts, and Ethics
   - Students will apply knowledge of historical, social, and cultural influences to understanding works of fine or literary arts as expressions of human experience.

5. Natural Sciences, Mathematics, and Technology
   - Students will interpret scientific principles, theories, and laws as they apply to the dynamic nature of scientific disciplines.

6. Social Sciences
   - Students will describe how historical, economic, political, social, and spatial relationships develop, persist, and change as well as how they are impacted by the complexity and diversity of individual and group behavior.
