Regional Science Fair February 13 at ABAC

TIFTON—The School of Science and Mathematics at Abraham Baldwin Agricultural College will host the Regional Science and Engineering Fair on Feb. 13 in Gressette Gym. Students in grades 6-12 who are eligible to enter the regional fair have participated in a local science fair in their county or school and were selected to participate at the regional level.

A total of 13 counties in Georgia including Ben Hill, Berrien, Brooks, Cook, Crisp, Grady, Irwin, Lanier, Lowndes, Thomas, Tift, Turner, and Worth will be represented at the fair. Over 130 projects will be entered in a number of different categories ranging from animal and plant sciences to physics, chemistry and biological and health sciences.

Student projects will be available for public viewing from 3–4 p.m. in Gressette Gym. The awards ceremony will begin at 3:30 p.m. in Howard Auditorium. The ceremony will also be open to the public. Awards will be given to the top two finishers in both the junior and senior divisions.

Dr. Carrie Ross Crabtree, an assistant professor of science in the School of Science and Mathematics, coordinates the science fair for ABAC. She said that science fair projects are sometimes the first step students take in becoming our researchers of tomorrow.

For more information, interested persons can contact Crabtree at (229) 391-5106.
